### Pacific Islands Climate Change Cooperative (PICCC)

The PICCC is the Landscape Conservation Cooperative (LCC) for Hawai'i and the U.S. affiliated Pacific Islands. It provides a range of scientific and technical decision support tools to a wide array of managers at the landscape and seascape scales. These tools help managers identify and design adaptation strategies and actions for native species, habitats, and cultural resources in the face of climate change and other stressors. The PICCC is sponsored and partly supported by the USFWS.

## **Wildlife and Sport Fish Restoration Program (WSFR)**

The WSFR Programs (Honolulu Office) administer and monitor grant programs in Hawai'i, American Samoa, the Commonwealth of the Northern Mariana Islands (CNMI), and Guam. The grant programs include Pittman-Robertson Wildlife Restoration (including Hunter Education), State Wildlife, Dingle-Johnson Sport Fish Restoration (including Aquatic Education and Boating Access), and Coastal Wetlands grants. The Honolulu office reviews proposals, assist grantees in their applications and grant proposal preparation, and monitors implementation and performance.

## **USFWS Migratory Birds and Habitat Programs**

The Migratory Birds and Habitat Programs (MBHP) are responsible for maintaining healthy migratory bird populations for the benefit of the American public. MBHP goals include ensuring long-term ecological sustainability for all populations of wild birds protected by the Migratory Bird Treaty Act, and increasing awareness of the intrinsic, ecological, recreational and economic value of migratory birds and their habitats. In the Pacific Islands, MBHP coordinates with other USFWS divisions, Hawaii DLNR, USDA, the US Military and various non-governmental organizations in work on ongoing and emerging issues including avian disease, invasive species, energy development, climate change, and management of permitted activities, primarily focusing on species that are not also listed as threatened or endangered under ESA.
